# Containment review rubric

Team: _____ Case: ____ Constraint: _____

**Document the requirement, constraint and acceptance evidence.**
This paper exercise scores written plans. State what is unverified and hold affected authority until verification. Receive a point when the item is written and defensible. A co-presenter checks a sample.

| Round | One point for each written, defended item | Score |
|---|---|---|
| Intent and PR review | [ ] Correct enforcement boundary<br>[ ] Measurable availability floor<br>[ ] Missing requirement or independent test | ___ / 3 |
| Exception and rollout | [ ] Approval verified or held for verification<br>[ ] Owner and explicit expiry requirements<br>[ ] Narrow workload/control scope | ___ / 3 |
| Containment | [ ] Ordered actions and trigger<br>[ ] Critical dependency or conflict identified<br>[ ] Evidence source and preservation step | ___ / 3 |
| Recovery | [ ] Observable exit test<br>[ ] Named rollback/lift authority<br>[ ] Service check and restored-control test | ___ / 3 |

**Independent proposal review: up to 3 additional points**
[ ] Explain the limited scope of the passing privilege tests.
[ ] Name the missing enforcement owner and required acceptance evidence.
[ ] Justify the exact authority granted or withheld, with remaining exposure explicit.

Preserve the original disposition before the reveal. A justified approval, revision, escalation or refusal can earn points. For a refused exception, document the scope, owner and expiry evidence required before reconsidering it.
Independent review score: ____ / 3
**Total workshop score: ____ / 15**

**Peer comparison:** name one specific, testable assumption that would reverse your plan. Record the evidence required; do not claim an unexecuted test passed.

Points assess the review process, not security assurance or human/model superiority.
